

- Needs only 3.5 volts to turn on
- Supplies up to 2 amps of current
- Can be used with multiple amplifiers or a power antenna
- Has a 2 second turn-on and turn-off delay

Wire connections:

Red wire	= +12VDC constant power
Black wire	= -12VDC ground
Green	= Min. 3.5 volts input trigger

(Green wire connection can be by a low voltage trigger lead or a speaker lead)

Blue wire	= +12VDC output (when green wire is triggered)
